

## The Role of Government in Solving Complex Societal Challenges

Municipalities are facing ever-growing challenges such as the energy transition, growing social inequality and migration. The traditional organisation of the public sector, however, is not set up for solving non-linear, multi-layered challenges. The following speakers will demonstrate examples on how wicked problems can be managed and what competences are needed:

### Speakers

### Get connected

**Iris Rickhoff-Fischer**

CEO and Coordinator of the public:START project at Domhan Vision  
iris@domhan-vision.com
