

# Cluj-Napoca brings electric public buses to Romania

## Improving mobility, air quality and daily life in the city

“

*In Cluj-Napoca, we are building urban mobility on multiple strategic directions: investments in infrastructure, means of transportation and public policies to encourage sustainable mobility*

”

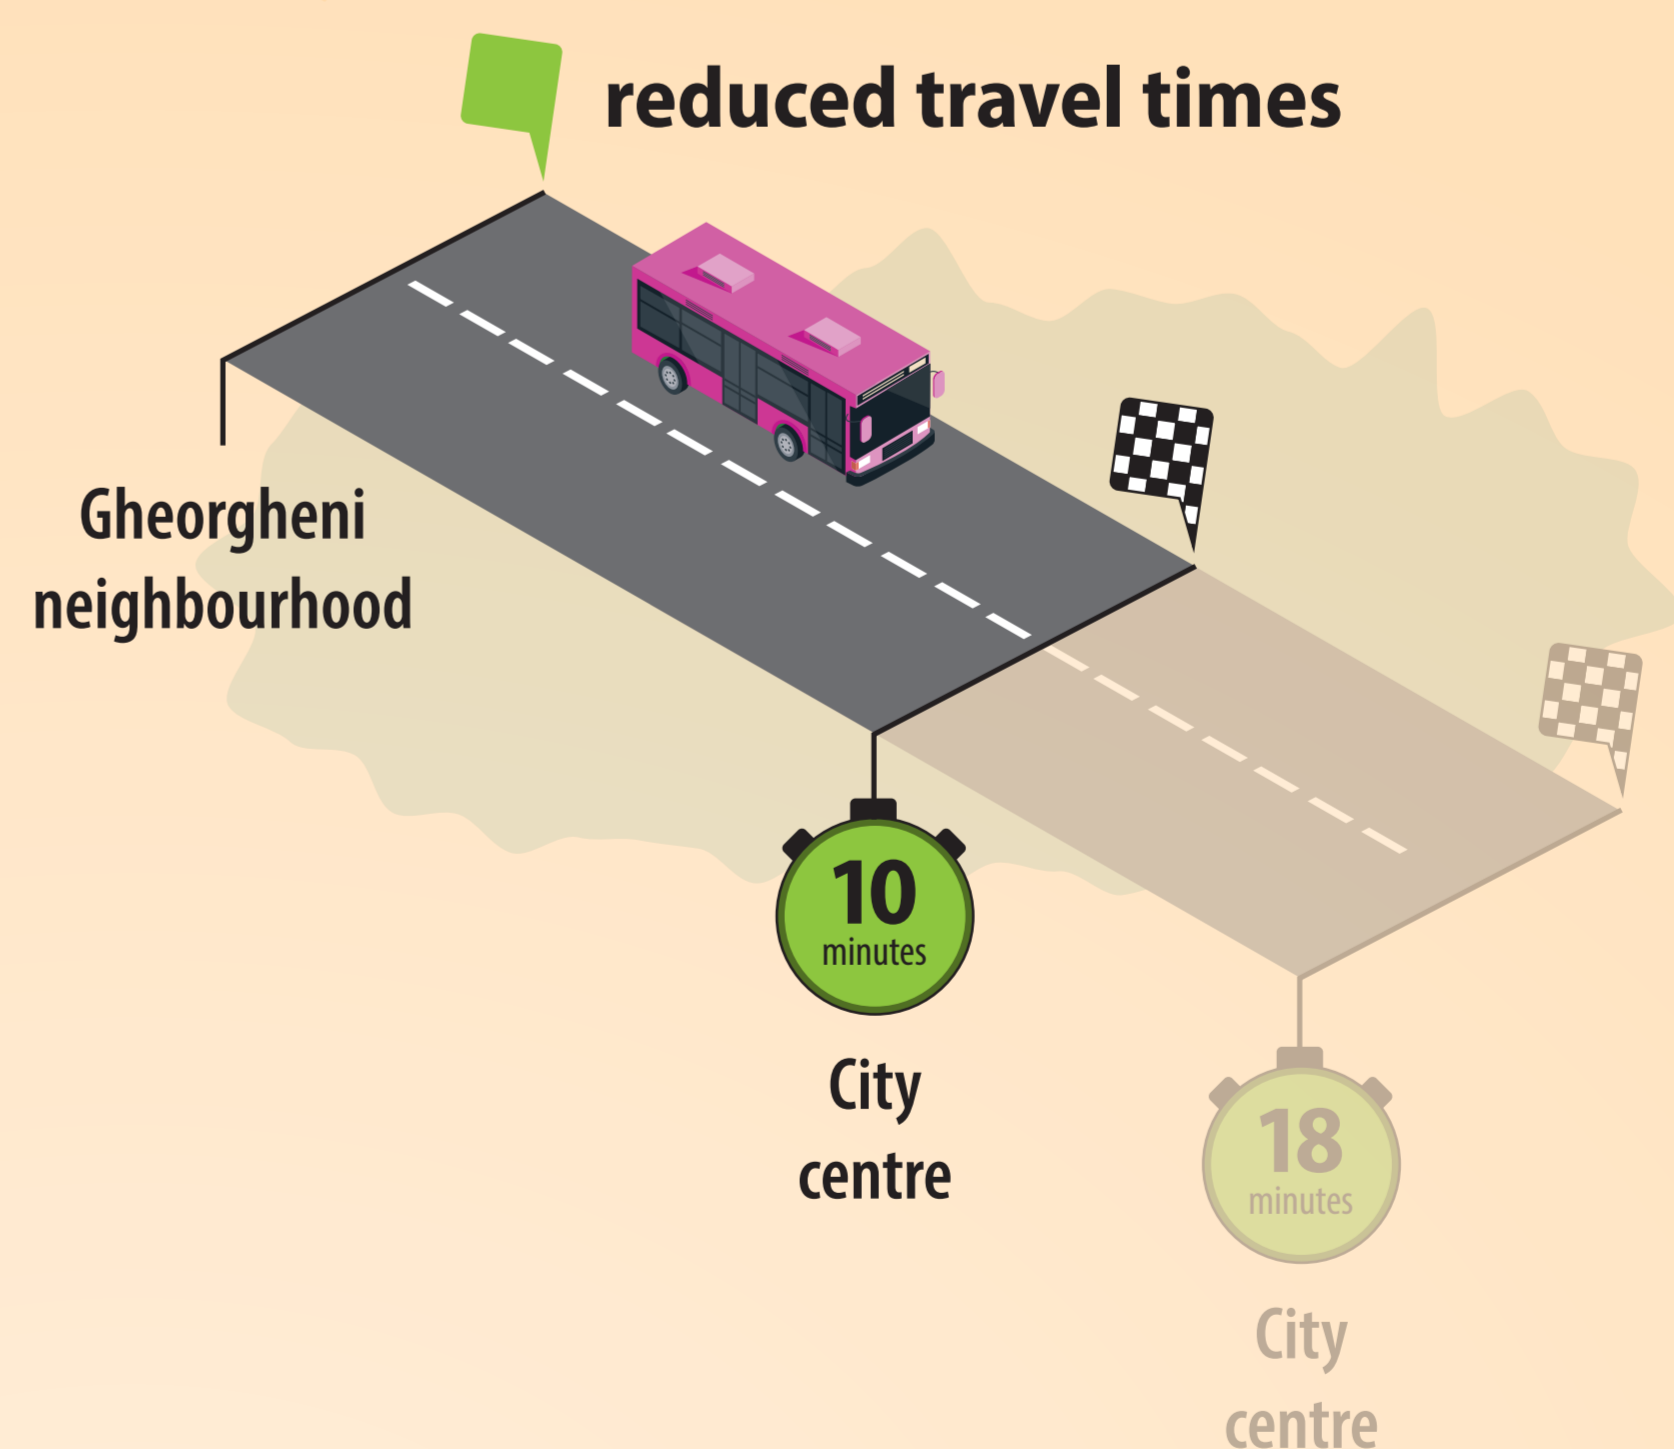

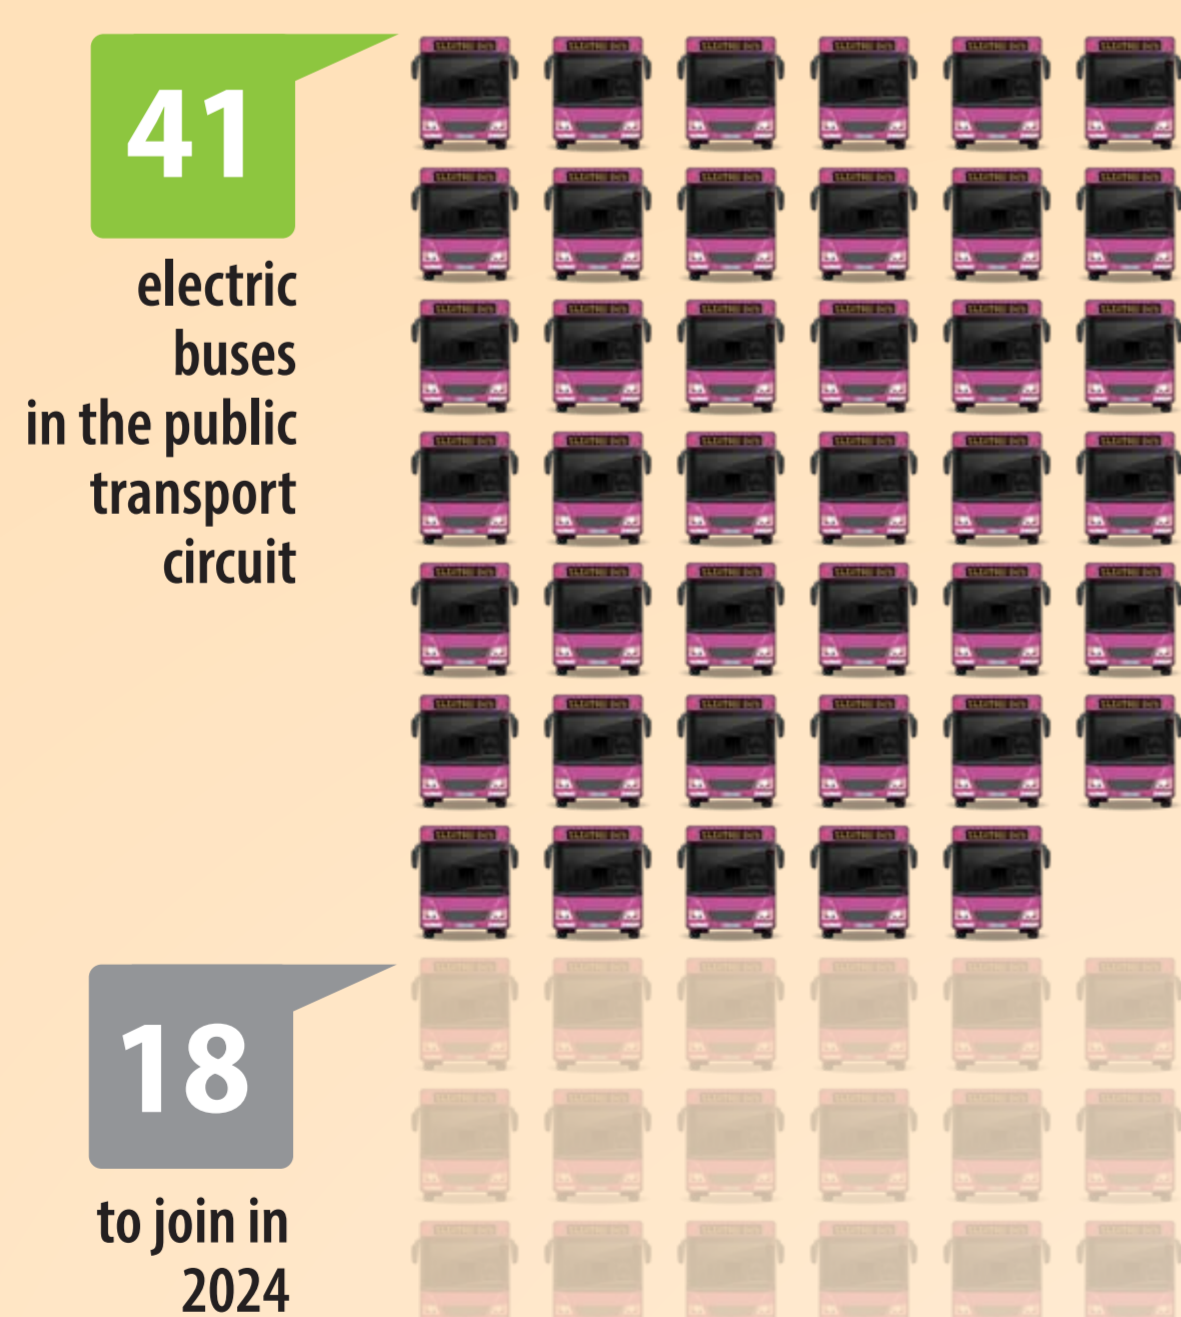

**Emil Boc**  
Mayor of Cluj-Napoca  
Chair of Commission for Territorial Cohesion  
Policy and EU Budget (COTER)

### Objective:

- Build an electric and non polluting public transport fleet by 2030

### Impact on local community:

- Better accessibility and clean mobility
- Improved air quality
- Reduce traffic congestion and road accidents
- Safer and more comfortable travels

### Funding:

- Over € 100 million into the modernisation of the public transport fleet financed by cohesion policy (ERDF and Cohesion Fund)
