

Catalonia goes digital with the help of its citizens and businesses

Promoting digital and mobile transformation in the region

“

Catalonia needs to advance in an economic and social model based on innovation, knowledge and digital transformation, promoting the digital economy as a motor to improve the competitiveness of companies

”

Meritxell Serret Aleu
Minister for Foreign Action and European Union,
Government of Catalonia

Objectives:

- Support the digital transition through the territory and include both local organisation and citizens in the process
- Help to open new markets and digitalise those that already exist
- Make Catalonia a focal point for advanced digital technologies

Impact on local community:

- Boost to digital, economic and social transformations
- Identification of key players and emerging digital technologies in the region
- Creation of synergies between traditional companies and ICT companies from emerging sectors
- Deployment of new digital infrastructures (5G), public-private networks and laboratories of innovation
- Contribution to activate other European cross-border initiatives on 5G, AI and drone technologies

Funding:

- Over € 3 million from cohesion policy (ERDF)
